Assignment 1 : County Mix 👣

<img src='images/county-mix.gif' width="30%" align="center" style="align:center;text-align:center;float:right;" alt="recap">

Aim 🏹

- Review your understanding of php basics

    - variables,strings,operations,inbuilt-functions,arrays,php-in-html

Instructions

1. Explore the file named county_mix.php which has a variable with some county data.
2. You should NOT modify the data manually and your code should start as indicated within the file
3. Present the data as a table with all the data in the following format(example);
#	Name	Governor	Website
1	Mombasa	Hassan Ali Joho	http://mombasa.go.ke
   4.Include the logo of the party along side each governor's name(where it exists)
#	Name	Governor	Website
1	Mombasa	Hassan Ali Joho <img width="10%" src="images/odm.png">	http://mombasa.go.ke
4. At the bottom of the table(tfoot), include the distribution of the political parties i.e. how many governors are from Jublilee,ODM etc.
